

DIARY NOTES

DD/S

21 June 1971

Request for Additional Funds: I telephoned [REDACTED] to 25X1A
identify our dilemma with the proposed request for an additional
\$450,000 (raising the total to \$750,000) for an additional 200-ton
chiller, a chiller header and a chilled water pipe extension and an
additional 2,000 KW transformer for installation in B Vault. I
suggested that if we could we would like to have Colonel White
understand that we are convinced that the need is upcoming prior
to the time that these items could be procured and installed even
though that need may not yet be as definable in as solid specifics
as we would prefer. [REDACTED] understood our position and agreed
to represent it in kind to Colonel White. He called subsequently to
say that Colonel White had approved the additional \$450,000 but had
asked confirmation, which [REDACTED] provided, that the needs
represented by this and related requirements were not dependent
upon approval of the proposed computer consolidation plan. [REDACTED] 25X1A
asked to see our memorandum which I elected not to send earlier since
it represented a degree of decision which I felt did not exist. [REDACTED] 25X1A
subsequently telephoned to ask help in revising our memorandum to make
it consistent with the position represented by him in his discussion with
Colonel White. I nominated [REDACTED] to work with him since [REDACTED]
and [REDACTED] are not available.

[REDACTED] telephoned following the PPB meeting with
Colonel White on funding of additional requirements. He advised that:

a. the transformer and chiller header request for
\$450,000 had been approved,

b. the special collection equipment request for
\$500,000 from O/C (in behalf of FI/D) was approved,

~~SECRET~~

c. the O/L request for funds for new equipment for PSD was not approved and that it gave the Executive Director considerable trouble, and (\$50,000 ok'd 23 June)

d. the O/S request for funds for the Kidde Alarm System equipment replacement was again deferred. (ok'd 23 June)

25X1A

[REDACTED] indicated subsequently that [REDACTED] was to meet with PSD on 22 June 1971 to flesh out the PSD equipment requirement information. I asked [REDACTED] to contact [REDACTED] to ensure that we did not go back unless we had a very solid case.
